

Central Valley Flood Protection Board Public Meeting

March 23, 2018

INFORMATIONAL BRIEFING

Joint Federal Project Wet Commissioning Briefing

Linda Finley, Chief, Mega Projects Center, Sacramento District, U.S. Army Corps of Engineers

BRIEFING SUMMARY

Informational briefing on the successful wet commissioning of all six gates of the Folsom Dam Joint Federal Project. This test took place on Friday, March 2, 2018, where all 6 Tainter gates were raised to 8 feet and held for 5 minutes. Approximate volume of water released was 2,351 acre-feet with flows at 44,280 cubic feet per second. All systems operated properly. This test concludes the commissioning of wet releases, all remaining tests can be performed in the dry.
