

## Central Valley Flood Protection Board Meeting

April 27, 2018

### Informational Briefing

#### Sutter Basin Flood Risk Management Project

Ali Porbaha, Board Staff  
Eric Butler, Department of Water Resources  
Michael Inamine, Sutter Butte Flood Control Agency  
Patrick Howell Jr., USACE

#### **BRIEFING SUMMARY**

Staff from the Department of Water Resources, Flood Projects Office (DWR), Sutter Butte Flood Control Agency (SBFCA), and U.S. Army Corps of Engineers (USACE) will provide an informational update on recently completed flood risk reduction improvements and repairs to approximately 37 miles of the Feather River West Levee constructed by SBFCA and cost-shared by the State through DWR's Early Implementation and Urban Flood Risk Reduction Programs, and the Deferred Maintenance Program. These improvements and repairs were approved by the USACE pursuant to U.S.C. Title 33, Section 408, and permitted by the Central Valley Flood Protection Board (Board). They were constructed by SBFCA consistent with the 2012 Central Valley Flood Protection Plan, and consistent with the USACE Sutter Basin Feasibility Study Recommended Plan approved in 2013 and authorized by the Water Resources Reform and Development Act (WRRDA) 2014.

Staff will then provide a status report on the Sutter Basin Flood Risk Management Project and the potential federal funding needed to construct the remaining approximately five miles of Feather River West Levee improvements south of Star Bend. Should funding be authorized a three-party Project Partnership Agreement between the Board, USACE, and SBFCA will be prepared for the Board's consideration at a future Board meeting.

Prepared By: Eric Butler, EIP/UFRR Project Manager, DWR
