Executive Officer Delegation Report

Posted 3/13/2014

Meeting Date: 03/28/2014

Number of Applications Scheduled: 2

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
18922	Chevron North America	The project is located south of Round Mountain Road and west of China Grade Loop, on the south side of the Kern River in Bakersfield, CA.	Kern	Kern River	To drill one steam injection well (KCL-39 Well 399 243TO) within the Kern River Designated Floodway.	N/A	The Board, as a responsible agency under CEQA, has reviewed Initial Study/Mitigated Negative Declaration (IS/MND) (SCH Number: 2011101048, September 2011) and Mitigation Measures for the Thermally Enhanced Oil Recovery Well Operation Project prepared by the lead agency, the San Joaquin Valley Unified Air Pollution Control District (District). These documents are available for review in hard copy at the Board and the District offices. The District determined that the project would not have a significant effect on the environment on September 19, 2011 and filed a Notice of Determination on September 23, 2011 with the State Clearinghouse. Board staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent's IS/MND and address impacts to air quality, biological resources, cultural resources, geology and soils, hydrology and water quality. The description of the mitigation measures are further described in the adopted IS/MND.
Issued							
18923	Ryan Johnson	The project is located in Marysville, south of Walnut Avenue at 2366 Kayla Court.	Yuba	Yuba River	To build a house with detached garage, a water well pump house and install a propane tank.	Marysville Levee District	The Board, acting as the CEQA lead agency, has determined the project is categorically exempt in accordance with CEQA under a Class 3 Categorical Exemption (CEQA Guidelines Section 15303) covering new construction of small structures.
