## **AGENDA**

### **CENTRAL VALLEY FLOOD PROTECTION BOARD WEST SACRAMENTO AND AMERICAN RIVER COMMON FEATURES TOUR**

**Friday, July 11, 2014  
9:00 AM – 1:00 PM**

### **TOUR SUMMARY:**

The Central Valley Flood Protection Board is planning an informational briefing and public tour to visit sites related to the U.S. Army Corps of Engineers' General Re-evaluation Reports for the West Sacramento and American River Common Features projects. The informational briefing and site visits will allow the Board and interested parties to gain a better understanding of the flood management and multi-benefit projects planned for the Sacramento area.

Tour participants will meet at 9:00 AM at the West Sacramento City Hall, in the second floor Council Chambers, for an informational briefing, followed by site visits to both West Sacramento and American River Common Features sites shown on the **attached maps**. More detailed maps for the tour stops will be provided at City Hall. The Board will visit two locations in the Southport area of West Sacramento and briefly return to City Hall. From there the Board will travel to Howe Avenue near U.S. Highway 50 to view construction of a jet slurry wall (site L10), followed by a visit to the Guy West Bridge erosion site along the American River. Attendees will provide their own transportation, and carpooling is encouraged. Required safety equipment will be provided at site L10. Participants should bring their own water and sun protection, and wear long pants with closed toe shoes.
