**Project Description:** *(please use a separate page if necessary)*

A Draft Supplemental Environmental Assessment/Environmental Impact Report (SEA/EIR) has been prepared for the Folsom Dam Modification Project – Water Control Manual Update. The purpose of the proposed action is to reduce flood risk and improve dam safety in the Sacramento Metropolitan Area by implementing operational changes of the new auxiliary spillway. The new operations will meet goals associated with dam safety and flood damage reduction benefits including: 1) passing the Probable Maximum Flood with three feet of free board, 2) controlling a 1/100 annual chance event, 3) control a 1/200 annual chance event, 4) reducing variable space storage from 400,000-670,000 acre feet (af) to 400,000-600,000 af as directed in Water Resources Development Act authorizations, and 5) incorporating improved forecasting capabilities from the National Weather Service. Environmental effects evaluated in detail include hydrology, water supply and deliveries, biological resources, recreation, hydropower, and cultural resources. Cultural resource impacts could be potentially significant and unavoidable.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Revised 2010
Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency please denote that with an "S".
