

Meeting Date: 10/28/2016

Number of Applications Scheduled: 4

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
10441-1	CA Department of Water Resources	The project is located on the right bank of the San Joaquin River, on Twitchell Island, approximately 2-1/2 miles upstream Three Mile Slough.	Sacramento	San Joaquin River	To modify an existing siphon pipe and to install a new self-cleaning fish screen and access platform, part of the Sherman and Twitchell Island Fish Screen Project. The structure will be supported on a pile foundation. This permit supersedes Permit No. 10441 that was issued to George Baigi on February 14, 1975, to replace irrigation pipe with a 24-inch siphon pipe and relocating 150 feet to the east.	Reclamation District 1601	The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH Number: 2016032007, March 2016) and Mitigation Measures for the Sherman and Twitchell Islands Fish Screen Project prepared by the Department of Water Resources as the lead agency. These documents including project design may be viewed at the Board and Department of Water Resources offices. The Department of Water Resources determined that the project would not have a significant effect on the environment and filed a Notice of Determination on April 15, 2016 with the State Clearinghouse. Staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent's IS/MND and address impacts to biological resources, cultural resources, hazards and hazardous materials. The description of the mitigation measures are further described in the adopted IS/MND.
19097	Bureau of Reclamation	The project is located on West Brannan Island Road approximately 4.16 miles southeast of Isleton.	Sacramento	San Joaquin River	To remove and replace the San Andreas Salinity Station: remove an existing wood deck, station building, conduits, and 5 piles and replace them with weathering steel bridges, guardrails, 4 12-inch diameter piles with caps and bracing, a new station building, gate, and conduit.	Brannan-Andrus Levee Maintenance District	The Board, acting as the CEQA lead agency, has determined the project is categorically exempt from CEQA under a Class 2 Categorical Exemption (CEQA Guidelines Section 15302) covering replacement of existing structures and facilities where the new structure will be located on the same site with the same purpose as the prior structures and facilities.
3869-1	Lor'rie White	The dwelling is located on the left bank of the Sacramento River, levee mile 14.61 and 2.3 miles west of intersection of I5 and SR80 in Sacramento County.	Sacramento	Sacramento River	This is a "name change" permit only and includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 3869 that was issued to Jack K. Leslie on February 1, 1962 for construction of a dwelling and garage on the waterside of left bank of Sacramento River.	Reclamation District 1000	This action does not have the potential for resulting in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment and thus is not a "project" for purposes of the California Environmental Quality Act (Public Res.Code § 21065; Guidelines § 15378(a)).
6184-1	JHW Trust	The project is located on the property at 4435 Garden Highway in Sacramento.	Sacramento	Sacramento River	This is a "name change" permit only and includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 6184 that was issued to Mr. & Mrs. Myron E. Cross on July 18, 1968, to authorize placement of sand dredged fill, construction of a dwelling, swimming pool, well, septic tank, and access ramps on the left bank of the Sacramento River.	Reclamation District 1000	The Board determined that the project is categorically exempt from CEQA under a Class 2 Categorical Exemption (CEQA Guidelines Section 15302) covering replacement of an existing structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced.
