

Meeting Date: 12/16/2016

Number of Applications Scheduled: 5

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
18347-1	Jesse Castellon	The project is located on the property at 4215 Curlew Street in the City of Stockton.	San Joaquin	Bear Creek	To construct concrete steps on the landside slope of the left (south) bank levee of Bear Creek in Stockton.	San Joaquin County Flood Control and Water Conservation District	The Board, acting as the CEQA lead agency has determined the project is exempt from CEQA under a Class 3 Categorical Exemption (CEQA Guidelines Section 15303) covering new construction of small structures.
19052	Solano County Water Agency	The project is located along 6,500 linear feet of Lower Putah Creek's south bank and 1,500 linear feet of McCune Creek's north bank in Yolo County.	Yolo	Putah Creek	To authorize the restoration of wildlife habitat by restoring the floodplain along 6,500 linear feet of Lower Putah Creek's south bank and 1,500 linear feet of McCune Creek's north bank. This was done by grading both creeks' banks and removal of invasive species. Site was replanted with native trees and shrubs.	Sutter Maintenance Yard	<p>Board staff has prepared the following California Environmental Quality Act (CEQA) determination:</p> <p>The Board, as a Responsible Agency under CEQA, has reviewed the Initial Study, Mitigated Negative Declaration (IS/MND) (SCH No. 2013072001, June 2013) and Mitigation Monitoring and Reporting Program (MMRP) for the Lower Putah Creek 2 North American Wetlands Conservation Act (NAWCA) Project, prepared by the lead agency, Solano County Water Agency (SCWA). The documents are also available for review in hard copy at the Board and SWCA offices.</p> <p>SCWA determined that the project would not have a significant effect on the environment on August 9, 2013, and subsequently filed a Notice of Determination on August 14, 2013 with the State Clearinghouse and Solano County Clerk. Board staff finds the proposed project will not have a potentially significant effect on the environment because SCWA, as lead agency, has required mandatory mitigation measures that will mitigate all potentially significant impacts to less than significant. These mandatory mitigation measures have been incorporated into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent's MMRP and address impacts to biological resources, cultural resources, hydrology and water quality.</p> <p>The documents and other materials which constitute the record of the Board's proceedings in this matter are in the custody of the Executive Officer, Central Valley Flood Protection Board, 3310 El Camino Ave., Suite 170, Sacramento, California 95821.</p>
19091	Sacramento County Department of Transportation	The project is located on Rio Linda Boulevard approximately 0.8 miles south of Elkhorn Boulevard in Rio Linda.	Sacramento	Dry Creek	To remove and replace an existing bridge with a new cast in place 2-lane bridge with 6-foot shoulders. Pavement rehabilitation will also occur on the approach roadways on both sides of the bridge consisting of removal of existing pavement, replacement of any failed roadway base areas, placement of new hot mix asphalt pavement, and installation of metal beam guardrail, bridge railings and revegetation plantings.	N/A	The Board, as a Responsible Agency under CEQA, has reviewed Initial Study, Negative Declaration (IS/ND) (SCH No. 2013062024, August 2015) for the Rio Linda Boulevard Bridge Replacement Project, prepared by the lead agency, Sacramento County. These documents including project design are available for review in hard copy at the Board and County offices. Sacramento County determined that the project would not have a significant effect on the environment and filed a Notice of Determination with the Sacramento County Clerk on October 20, 2015. Board staff finds that the proposed project will not have a potentially significant effect on the environment because revisions in the project have been made or agreed to by the project proponent.
19098	Pacific Gas and Electric Company (PG&E)	The project is located crossing the Bear River north of Jackson Road and approximately 1 mile southeast of Wheatland.	Sutter	Bear River	To authorize a pre -existing electrical transmission line and poles that cross the Bear River.	Reclamation District 2103	The Board, acting as the CEQA lead agency has determined the project is exempt from CEQA under a Class 1 Categorical Exemption (CEQA Guidelines Section 15301) covering exisitng structures.

Executive Officer Delegation Report

Meeting Date: 12/16/2016

Number of Applications Scheduled: 5

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
19141	Locke Ranch, Inc.	The project is located approximately 1.25-miles northwest of the town of Lockeford.	San Joaquin	Mokelumne River	To authorize an existing agricultural pump, 12-inch diameter pipeline, concrete outfall box, and fish screen on the left bank of the Mokelumne River.	San Joaquin County Flood Control and Water Conservation District	The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH Number: 2016092013, August 2016), and the Mitigation Monitoring and Reporting Plan (MMRP) for the Locke Ranch Fish Screen Project prepared by the Department of Fish and Wildlife as the lead agency. These documents, including project design are available for review at the Board and the Department of Fish and Wildlife offices. The Department of Fish and Wildlife determined that the project would not have a significant effect on the environment and on October 6, 2016 filed a Notice of Determination with the State Clearinghouse. Board staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures address impacts to biological resources, cultural resources, geology and soils, hazardous materials, hydrology and noise. The mitigation measures are further described in the adopted IS/MND.
