Number of Applications Scheduled: 3

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
19166	North San Joaquin Water Conservation District (NSJWCD)	The project is located within the Mokelumne River Designated Floodway, approximately 0.33 miles west of North Tretheway Road, in Lockeford.	San Joaquin	Mokelumne River	To remove and replace the existing pump station, ditch, wet well, and a new 24-inch diameter pipeline. The improvements will also include removal and replacement of existing fish culvert; rock slope protection at the end of the new fish culvert; 12-foot wide access road; electrical pads and power poles along the access road.	N/A	<p>The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH No. 2016032012, August 11, 2016) and Mitigation Monitoring Program for North San Joaquin Water Conservation District’s South System Improvements Project, prepared by the lead agency, San Joaquin County Department of Public Works. These documents including project design are available for review in hard copy at Board and North San Joaquin Water Conservation District offices.</p> <p>North San Joaquin Water Conservation District determined that the project would not have a significant effect on the environment on August 29, 2016 and filed a Notice of Determination on September 1, 2016, with the County Clerk. Board staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent’s IS/MND and address impacts to biological resources, cultural resources, and noise, the description of the mitigation measures are further described in the adopted IS/MND.</p> <p>The documents and other materials which constitute the record of the Board’s proceedings in this matter are in the custody of the Executive Officer, Central Valley Flood Protection Board, 3310 El Camino Avenue, Suite 170, Sacramento, California 95821.</p>
19168	Maine Prairie Water District	The project is located along Ulatis Creek approximately 70 feet south of Brown Road in Solano County.	Solano	Ulatis Creek	To Install a Pump Station (PS2), a 48-inch diameter and a future 36-inch diameter pipeline parallel to the stream, four conical fish screens up to 14 feet in diameter at PS2, and to enlarge Maine Prairie Water District Canal for last 1/2 mile up to the Maine Prairie Road.	N/A	<p>The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH No. 2016112030, December 2016) and Mitigation Monitoring, and Reporting Plan for the Maine Prairie Water District Ulatis Creek Pump Stations Project, prepared by the lead agency Maine Prairie Water District. These documents including project design are available for review in hard copy at Board and Maine Prairie Water District offices.</p> <p>Maine Prairie Water District determined that the project would not have a significant effect on the environment on December 20, 2016, and filed a Notice of Determination on December 21, 2016 with the Solano County Clerk. Board staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent’s IS/MND and address impacts to air quality, biological resources, hazards and hazardous materials, hydrology and water quality, and energy use, the description of the mitigation measures are further described in the adopted IS/MND.</p> <p>The documents and other materials which constitute the record of the Board’s proceedings in this matter are in the custody of the Executive Officer, Central Valley Flood Protection Board, 3310 El Camino Avenue, Suite 170, Sacramento, California 95821.</p>
