

Meeting Date: 03/23/2018

Number of Applications Scheduled: 6

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
15983-1	Lynette Brydon	The project is located southeast of the City of Isleton approximately 2,000 feet upstream (northwest) on Terminous Road from the intersection with State Highway 12. Section 1, T3N, R3E, M.D.B.&M. (Brannan-Andrus Levee Maintenance District), Georgiana Slough, Sacramento County.	Sacramento	Georgiana Slough	This is a "name change" permit that includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 15983 that was issued to John and Marilyn McDowell on January 12, 1993, to construct a building pad on the landside levee slope and right of way, install utility lines through the levee (for future use), and construct a floating boat dock secured by wooden piles on the right bank of Georgiana Slough.	Brannan-Andrus Levee Maintenance District	This action does not have the potential for resulting in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment and thus is not a "project" for purposes of the California Environmental Quality Act (Public Res.Code § 21065; Guidelines § 15378(a)).
19121	Wave Broadband	The project crosses the west Yolo Bypass levee and continues along I-80 finally crossing the east levee of Yolo Bypass at the Levee road by Exit 32A.	Yolo	Yolo Bypass	To install a new 4-inch diameter galvanized steel conduit onto the Interstate-80 (I-80) Bridge that crosses the Yolo Bypass. Where I-80 is not elevated and supported by bridge bents within Yolo Bypass, the conduit will be installed below ground adjacent to I-80.	Sacramento Maintenance Yard	The Board determined that the project is categorically exempt from CEQA under a Class 1 Categorical Exemption (CEQA Guidelines Section 15301) covering minor alterations to existing facilities.
19137	California Department of Water Resources	The project is located along the Southeast portion of Decker Island adjacent to Horseshoe Bend.	Solano	Sacramento River	To lower a 300-foot section of private levee on the north side of Decker Island; reconfigure internal berms; and widen the existing breach at the southern end of the island.	N/A	<p>The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH Number: 2016082013, August 2016) and Mitigation Measures for the Decker Island Restoration Project prepared by the lead agency, the Department of Water Resources (DWR). These documents are available for review in hard copy at the Board and the Department offices.</p> <p>The DWR determined the project would not have a significant effect on the environment and filed a Notice of Determination on April 26, 2017 with the State Clearinghouse. Board staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent's IS/MND and address impacts to water quality. The description of the mitigation measures are further described in the adopted IS/MND.</p>

Executive Officer Delegation Report

Meeting Date: 03/23/2018

Number of Applications Scheduled: 6

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
19155	City of Sacramento	The project is located on the landside of the Sacramento River east levee near Jibboom Street, adjacent to the water intake structure in Sacramento.	Sacramento	Sacramento River	To grade an area adjacent to Sacramento River's east bank levee for the installation of a walkway leading to a new parking lot, and to install concrete steps.	American River Flood Control District	<p>The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH No. 2010032067, March 2010) and Mitigation Monitoring Program for Powerhouse Science Center Project, prepared by the lead agency, the City of Sacramento. These documents including project design are available for review in hard copy at Board and the City of Sacramento.</p> <p>The City of Sacramento determined that the project would not have a significant effect on the environment on June 1, 2010 and filed a Notice of Determination on June 2, 2010 with the County Clerk and the State Clearinghouse. Board staff finds that although the proposed project could have a potentially significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. The project proponent has incorporated mandatory mitigation measures into the project plans to avoid identified impacts or to mitigate such impacts to a point where no significant impacts will occur. These mitigation measures are included in the project proponent's IS/MND and address impacts to biological resources, cultural resources, geology and soils, hydrology, and noise, the description of the mitigation measures are further described in the adopted IS/MND.</p> <p>The documents and other materials which constitute the record of the Board's proceedings in this matter are in the custody of the Executive Officer, Central Valley Flood Protection Board, 3310 El Camino Avenue, Suite 170, Sacramento, California 95821.</p>
19200	Pacific Gas and Electric Company	The project is located where Pock Lane crosses Duck Creek, approximately 1 mile south of the intersection of East Mariposa Road and Pock Lane.	San Joaquin	Mormon Slough	To authorize the aerial crossing of the 12kV and 60kV lines over Duck Creek that is part of the Stockton A-Weber 60 kV power line.	San Joaquin County Flood Control and Water Conservation District	The Board, acting as the CEQA lead agency, has determined the project is exempt from CEQA under a Class 1 Categorical Exemption (CEQA Guidelines Section 15301) covering existing facilities.
3895-1	D&R Livestock	The project is located along the left (north) bank of Lindsey Slough at its confluence with Hastings Cut (McCoy Slough).	Solano	Lindsey Slough	This is a "name change" permit that includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 3895 that was issued to Peter Persic on April 5, 1962, to repair the drainage structure on the left bank of Lindsey Slough, levee mile 0.06, Unit 2, Solano County.	Reclamation District 2060	This action does not have the potential for resulting in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment and thus is not a "project" for purposes of the California Environmental Quality Act (Public Res. Code § 21065; Guidelines § 15378(a)).
