16369-1	Sacramento Area Flood Control Agency	This parcel is located at 5890 Riverside Blvd, Sacramento CA 95822, approx. Levee Mile 2.02; formerly under the ownership of "Wesley J Silva Living Trust", and recently purchased by SAFCA in May 2019. The original encroachment permit was issued by the State of California Reclamation Board on May 12, 1995	Sacramento	Sacramento River	This is a name change permit only and includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 16369 that was issued to Joseph Wesley Silva on May 12, 1995 to authorize "To authorize an existing house, garage, carport, walkway, retaining walls, and oleander along the landward toe, a gated chain-link fence along the landward shoulder (authorized under Permit No. 13425 BD) and slope, and concrete steps, wooden terraces for plantings, one loquat tree, and one walnut tree on the landward slope of the left bank levee of the Sacramento River."	N/A	<p>Board staff has prepared the following California Environmental Quality Act (CEQA) determination:</p> <p>An application to change the name of the permittee does not have the potential to result in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment, and thus, is not a "project" for purposes of the California Environmental Quality Act (Public Resources Code § 21065; CEQA Guidelines § 15378(a)).</p>
19021	John Wurster	The property is located along River Road, north of Randall Island Road, in Courtland.	Sacramento	Sacramento River	To replace an existing fence with a new galvanized chain-link fence with a gate.	Reclamation District 813	Board staff has determined the project is exempt from CEQA under the Class 2, Replacement and Reconstruction categorical exemption (CEQA Guidelines §15302) because the proposed activity consists of the replacement of an existing fence with a new galvanized chain-link fence and gate. Further, none of the exceptions to the exemption in CEQA Guidelines § 15300.2 apply.
19223	West Stanislaus Irrigation District	The project is located approximately 2.8 miles north of the Town of Grayson and 0.3 mile upstream of the confluence of the San Joaquin and Tuolumne River.	Stanislaus	San Joaquin and Tuolumne	To install a new screened intake structure with a pump station on the left (west) bank of the San Joaquin River; to install two new (60-inch and 96-inch diameter) steel water conveyance pipelines, each approximately 2,100 feet, connecting the proposed pump station to the existing West Stanislaus Irrigation District intake canal.	N/A	<p>Board staff has prepared the following California Environmental Quality Act (CEQA) determination:</p> <p>The Board, as a responsible agency under CEQA, has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) (SCH No. 2017092008, December 2017), and the Mitigation Monitoring and Reporting Program (MMRP) for the West Stanislaus Irrigation District Fish Screen Intake Project, prepared by the lead agency, West Stanislaus Irrigation District. These documents, including project design, are available for review in hard copy at the Board and the District offices.</p> <p>The District determined that the West Stanislaus Irrigation District Fish Screen Intake Project would not have a significant effect on the environment and filed a Notice of Determination with the State Clearinghouse on February, 20, 2018. The District made revisions to the project and/or incorporated mandatory mitigation measures into the project plans to avoid impacts or to mitigate such impacts to a point where no significant adverse impacts will occur. These mitigation measures are included in the District's IS/MND and address impacts to air quality, biological resources, cultural resources, geology, and hazards and hazardous materials The mitigation measures are further described in the District's adopted IS/MND.</p> <p>In accordance with CEQA Guidelines § 15096, Board staff independently reviewed the District's IS/MND, and finds these environmental documents prepared by the lead agency adequately address hydrology impacts, including potential flood risk, within the Board's jurisdiction. The Board, as a responsible agency, is responsible for mitigating and avoiding only the direct and indirect environmental effects of those parts of the project which it decides to carry out, finance, or approve (CEQA Guidelines § 15096(g); Public Resources Code § 21002.1(d)). In accordance with CEQA Guidelines § 15096(f) and (g), staff recommends that the CVFPB Executive Officer approve the responsible agency findings associated with Permit No. 19223, as the project would not result in any significant adverse impacts related to flood risk, and no additional mitigation measures within the Board's jurisdiction are required.</p> <p>The documents and other materials which constitute the record of the Board's proceedings in this matter are in the custody of the Executive Officer, Central Valley Flood Protection Board, 3310 El Camino Ave., Suite 170, Sacramento, California 95821.</p>
