

Meeting Date: 09/27/2019

Number of Applications Scheduled: 7

App No	Applicant	Location Description	County	Stream	Project Description	LMA Endorsement	CEQA Finding
1734-1	Davis Ranches	The project is located approximately 0.7 miles east of the intersection of State Route 45 and Buster Road, about 1.5 miles southwest of the town of Meridian.	Colusa	Sacramento River	To remove and replace an existing deteriorated 10-inch diameter drainage steel pipe with a new 10-inch diameter drainage steel pipe up-and-over the right (west) bank levee of the Sacramento River.	Sacramento River West Side Levee District	Board staff has determined the project is exempt from CEQA under the Class 2, Replacement or Reconstruction categorical exemption (CEQA Guidelines §15302) because the activity consists of the removal and replacement of an existing deteriorated drainage pipe. The replacement pipe will have substantially the same purpose and capacity as the existing drainage pipe, and the project involves negligible expansion of an existing use. Further, none of the exceptions to the exemption in CEQA Guidelines Section 15300.2 apply.
19119-1	California Department of Water Resources	The project is located within the Yolo Bypass, adjacent to the west levee of the Sacramento River Deep Water Ship Channel, approximately 11.5 miles southeast of the City of Dixon.	Yolo	Toe Drain	This is a "name change" permit only and includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 19119 that was issued to Charles Tyson on April 2, 2018, "To restore 359-acre intertidal wetlands, known as the Yolo Flyway Farms Restoration Project, by creating tidal channels and swales within the Yolo Bypass. The project includes an 80-acre parcel that will be used as a spoil site for excavated material that will be graded to be no more than 6-inches in depth."	N/A	Board staff has prepared the following California Environmental Quality Act (CEQA) determination: An application to change the name of the permittee does not have the potential to result in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment, and thus, is not a "project" for purposes of the California Environmental Quality Act (Public Resources Code § 21065; CEQA Guidelines § 15378(a)).
19380	Armoto Partners	The project is located southwest of Stockton Metropolitan Airport, 1.9 mile west of State Route 99, and 0.8 mile northeast of East French Camp Road.	San Joaquin	French Camp Slough	To construct a storm-water outfall structure in Littlejohn Creek.	N/A	
19432	CVIN, LLC	The project is located approximately 0.3 miles north of the intersection of State Route 4 and Escalon Bellota Road, in the town of Farmington	San Joaquin	Duck Creek	To install a fiber optic cable aerial crossing over Duck Creek. The support poles will be installed outside CVFPB's right-of-way.	San Joaquin County Flood Control and Water Conservation District	Board staff has determined the project is exempt from CEQA under the Class 3, New Construction categorical exemption (CEQA Guidelines §15303), because the proposed activity involves installing support poles for a fiber optic cable aerial crossing. Further, none of the exceptions to the exemption in CEQA Guidelines § 15300.2 apply.
19457	Walter Koenig	The project is located approximately 1 mile east of the intersection of Miner Slough bridge and Ryer Road, in the northern section of Ryer Island.	Solano	Miner Slough	To authorize an existing 8x8x7 ft. pump house with retaining walls on the waterside slopes; a 6-inch diameter galvanized steel intake pipe connected to the pump on the waterside slope, and an 8-inch diameter steel pipe with air release valve running from the pump through the levee crown to the landside slope; a 2-inch diameter steel electric conduit supplying power to the pump from an electric pole on the landside slope. The levee at this location has been setback, and all encroachments have been relocated prior to the adoption of the system.	Reclamation District 501	Board staff has determined the project is exempt from CEQA under the Class 1, Existing Facilities categorical exemption (CEQA Guidelines § 15301), because the activity involves the permitting of the following existing facilities: an existing pump house, retaining walls, galvanized steel pipe(s), an electric conduit, and an electric pole. Further, none of the exceptions to the exemption in CEQA Guidelines § 15300.2 apply.
19458	J&R Kalfsbeek Inc	The project is located approximately 4 miles south of Colusa.	Colusa	Colusa Basin Drain and Canal	To remove and replace an existing 36-inch-diameter steel drain pipe through the left (east) bank levee of the Colusa Basin Drainage Canal. To place the new pipe into the existing headwalls and install new slide gates. The original pipe was authorized under Permit No. 9390 at LM 9.24. The pipe is shown in the O&M manual at LM 9.24 and shown in as-built drawing 50-04-3081 at station 1810+96.5.	Sutter Maintenance Yard	Board staff has determined the project is exempt from CEQA under the Class 2, Replacement or Reconstruction categorical exemption (CEQA Guidelines §15302) because the activity consists of the removal and replacement of an existing failed drainage pipe. The replacement pipe will have substantially the same purpose and capacity as the existing drainage pipe, and the project involves negligible expansion of an existing use. Further, none of the exceptions to the exemption in CEQA Guidelines Section 15300.2 apply.
2971-1	Colusa Properties, Inc.	The project is located on the left (east) bank of the Sacramento River, approximately 6.5 miles north of Colusa Bridge.	Colusa	Sacramento River	This is a "name change" permit only and includes conditions that are consistent with current flood control standards and policies of the Central Valley Flood Protection Board. This permit supplements Permit No. 2971 that was issued to Hollis Sartain on December 18, 1958 for the installation of two irrigation pumps and a 36-inch diameter and 110 feet long corrugated metal pipe through the left (east) bank levee of the Sacramento River.	Maintenance Area 1
