Project Title: Yuba Levee Stability Berm Strengthening

TERRY A. HANSEN, County Clerk  
BY BOBBI JOHNSON  
Deputy Clerk

Project Location - Specific: Yuba River Levee, Station 2151+79 to Station 2156+36

Project Location - City: Vicinity of Marysville, CA Project Location - County: Yuba

**Description of Nature, Purpose and Beneficiaries of Project:** The Three Levee Rivers Improvement Authority ("TRLIA") will conduct a project to strengthen a section of an existing stability berm located upon an existing seepage berm along the Yuba River levee in the vicinity of Marysville, CA. The project will involve adding approximately 7,700 cubic yards of fill to raise the existing stability berm to approximately the same height as the existing levee, an increase in volume of approximately 10 percent. The work will be done along a 457-foot long section of the existing berms. Stockpiled and any needed additional topsoil will be spread over the enlarged stability berm to aid the establishment of a grass cover for erosion protection. The project will not increase the footprint of the existing berms. All work will be done within TRLIA's right of way. The purpose of the project is to ensure that the Yuba Levee provides its intended level of flood protection, which will benefit area residents by reducing the probability that their properties will be inundated by flood waters.

Name of Public Agency Approving Project: Three Rivers Levee Improvement Authority

Name of Person or Agency Carrying Out Project: Three Rivers Levee Improvement Authority

Exempt Status: (check one)

☒ Categorical Exemption. State type and section number: CEQA Guidelines, 14 Cal. Code Regs. §§ 15301 (Existing Facilities), 15302 (Replacement or Reconstruction), 15303 (New Construction of Small Structures) 15304 (Minor Alterations to Land).

**Reasons why project is exempt:** The project is exempt from CEQA pursuant to 14 Cal. Code Regs. § 15301 (Existing Facilities) because it involves the minor alteration of the existing berms, and will not expand the existing use of the existing berms because the footprint of the berms will not change. The project is also exempt from CEQA pursuant to 14 Cal. Code Regs. § 15302 (Replacement or Reconstruction) because the completed structure will be located on exactly the same site as the existing structure and will have substantially the same purpose and capacity as the existing structure. Alternatively, the project is also exempt from CEQA pursuant to 14 Cal. Code Regs. § 15303 (New Construction of Small Structures) because it consists of the construction of a new, small addition to the existing berms. Finally, the project is exempt from CEQA pursuant to 14 Cal. Code Regs. § 15304 (Minor Alterations to Land) because it involves the addition of a relatively minor amount of fill to land and does not involve the removal of mature, scenic trees, or grading in a waterway or on land with a slope of more than 10%. TRLIA has determined that because none of the exceptions to CEQA's categorical exemptions apply to this project, the categorical exemptions listed above can be relied upon.
